EX. No.3.2 CREATE 3D MODEL FROM ORTHOGRAPHIC PROJECTION

Date: 05-11-2026

AIM

To create a 3D model from the given orthographic projection using the Autodesk Fusion 360 tool.

REQUIREMENTS

1. Autodesk Fusion 360
2. Windows 10
3. 16 GB of RAM (integrated graphics recommended 1 GB or more)
4. 2.5 Mbps or faster download; 500 Kbps or faster upload

PROCEDURE

1. Open a new file and then select the Sketch icon.
2. Select the plane for sketching.
3. Use the sketching features under the CREATE menu (Line, Circle, Arc, Rectangle, Polygon, etc.) to draw the given sketch.

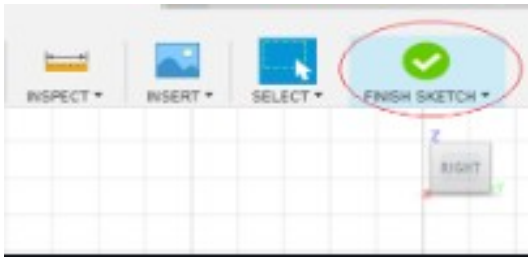

4. Use the sketch modifying features under the MODIFY menu (Fillet, Trim, Extend, Offset, Move/Copy, Mirror, etc.) to edit the sketch.

5. Use the Inspect > Measure feature to check the dimensions of the sketch.

6. After finishing the sketch, use the Finish Sketch option to finalize the sketch.

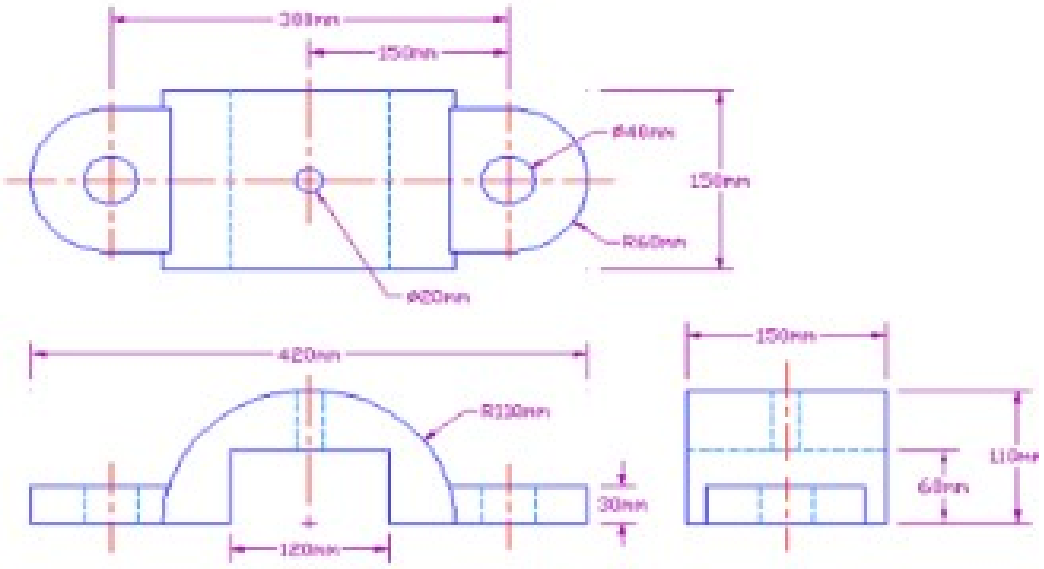

7. Use the Extrude option under the CREATE menu to convert the sketch into a 3D model.

8. After finishing the model, convert it to a drawing sheet in ISO standard (Design > Drawing > From Design).

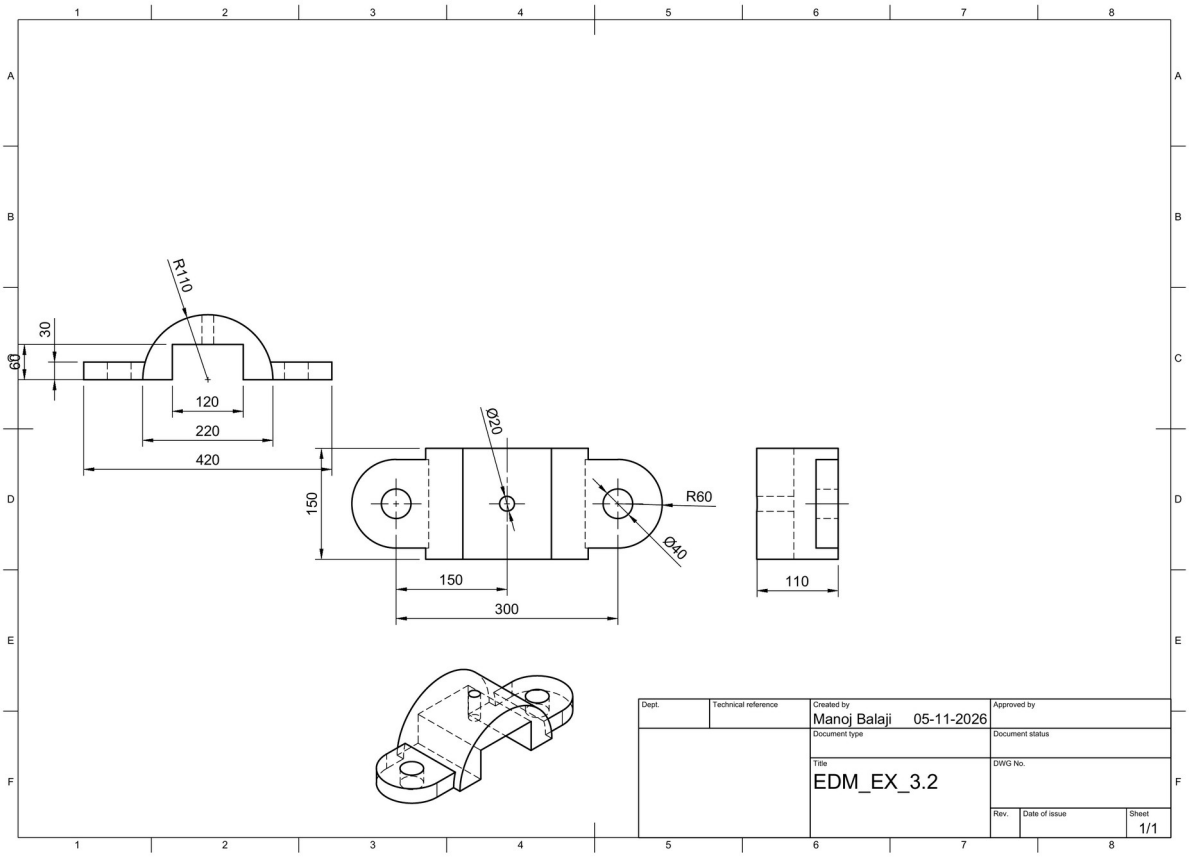

INPUT

Given orthographic projection (top, front and right views)

OUTPUT

3D model drawing sheet in ISO standard with orthographic views

RESULT

Thus, the 3D model is created from the given orthographic projection.
